EXPERT REPORT OF HAL SILCOX, III, M.D.

Submitted pursuant to
Federal Rule of Civil Procedure 26(a)(2)(B)
In connection with the matter of:

April Kimbrough,

Plaintiff,

v.

Lyle Weidner, Quality Carriers, Inc. and Old Republic Insurance Company,

Defendants.

Civil Action No.: 1:17-CV-00774-WSD

United States District Court
Northern District of Georgia
Atlanta Division

Honorable William S. Duffey

I. Introduction

This report has been prepared at the request of counsel for the Defendants in order to satisfy the requirements of Rule 26 of the Federal Rules of Civil Procedure in connection with April Kimbrough v. Lyle Weidner, Quality Carriers, Inc. and Old Republic Insurance Company, Civil Action No. 1:17-CV-00774-WSD, currently pending in the United States District Court, Northern District of Georgia, Atlanta Division. The purpose of this report is to provide opinions regarding my review of Ms. Kimbrough's medical records in light of her allegation that a March 1, 2016 motor vehicle accident (the "MVA") caused injuries to her body, and more specifically to her low back. I have been provided sufficient information to form the opinions set forth below, but reserve the right to alter same or render additional opinions as new information becomes available.

II. Synopsis of Expert Qualifications

A current copy of my *curriculum vitae* containing a listing of publications, testimony history and statement of compensation are attached in Appendix A and incorporated herein by reference.

III. Prior Cases – Expert Testimony

A list of other cases in which I have testified as an expert is attached hereto in Appendix B and incorporated herein by reference.

IV. Reference Materials, Documents and Evidence Considered

1. The subject Motor Vehicle Accident Report
2. Ms. Kimbrough's medical records from The Center for Pain Management
3. Ms. Kimbrough's medical records from St. Mary's Hospital
4. Ms. Kimbrough's medical records from Well Star Cobb Hospital
5. Ms. Kimbrough's medical records from AICA Ortho & Spine

6. Ms. Kimbrough's medical records from American Health and HIRAM Imaging, including MRI films and reports
7. Summary of Plaintiff's deposition testimony regarding a prior injury and other MVAs provided by counsel for Defendants.

V. Abstract, Analysis & Conclusion

Ms. Kimbrough presented to St. Mary's on March 1, 2016; however, St. Mary's records are illegible on certain pages. Reviewing these records in full is important as they provide information regarding a patient's clinical state immediately after an injury. In any event, it appears a chest x-ray and cervical spine x-ray was performed at St. Mary's. Said Chest x-ray impression was as follows: "No evidence of acute cardiopulmonary process". Said x-ray of cervical spine impression was as follows: "No definite acute bony abnormality of the cervical spine. If there is concern for fracture in the setting of trauma, CT is recommended." It does not appear x-rays of the thoracic spine or lumbar spine were performed at St. Mary's.

Following her visit to St. Mary's, Ms. Kimbrough presented to AICA Ortho and Spine several times for chiropractic care. Her initial evaluation was on March 7, 2016. Notes indicate Ms. Kimbrough had a prior accident, but denied having any residual symptoms. To further determine causation, it would be important to investigate any prior trauma(s) and any resulting injury. In any event, there was no specific mention of low back pain. Furthermore, Ms. Kimbrough was listed at 5'2" and 219 with a BMI of over 40. Clinically this would make Ms. Kimbrough morbidly obese, which increases the chances of degenerative disc disorder. Ms. Kimbrough was evaluated at AICA Ortho and Spine by Dr. Lori Lynch on March 10, 2016 and there was no mention of low back issues.

On March 22, 2016, Ms. Kimbrough voiced a complaint of low back pain. Prior to this visit there was no mention of low back pain related to the MVA. Thereafter, Dr. Kabakibou, of The

Center for Pain Management, ordered MRI studies of the cervical spine and lumbar spine and ultimately performed facet injections and Radiofrequency Thermocoagulation. MRI studies were completed on April 1, 2016 at Hiram Imaging. The MRI impression lumbar spine was as follows: “1. It should be first noted that a transitional vertebra is labeled at L5. Details above. 2. L4-5: A posterior disc herniation is at least a protrusion, very probably an extrusion that is just contacting the thecal sac. The appearance is compatible with a recent development; although the disc is mildly degenerated. 3. Mild facet degeneration at L3-4 and L4-5, but without effusion or significant medial hypertrophy.” MRI cervical spine impression “1. C5-6: Posterior prominence of the disc most compatible with protrusion causing deformity of the thecal sac that does not contact or compress the cord. 2. C3-4: A left posterior combination disc bulge and spur is causing potentially significant deformity of the thecal sac. No cord compression. 3. Straightening of the lordosis, which can indicate soft tissue injury. Correlation is necessary in that regard.”

After review of the above-referenced material, including medical records from The Center for Pain Management, St. Mary's Hospital, Well Star Cobb Hospital, AICA Ortho & Spine, American Health and HIRAM Imaging, including diagnostic MRI studies, it is my opinion, to a reasonable degree of medical certainty, that Ms. Kimbrough's alleged back and pain, did not result from the MVA. Furthermore, I question the severity of Ms. Kimbrough's injuries and extensive treatment that was provided to Ms. Kimbrough. One concern is Ms. Kimbrough did not report any lower back pain until March 22, 2016 after an ER visit and multiple visits with a chiropractor and physician at AICA Ortho Spine. Immediately after the MVA, it appears Ms. Kimbrough had complaints of chest pain and neck pain, but did not have complaints of back pain and no diagnostic tests were performed in the ER of the low back. Ultimately, Ms. Kimbrough was treated for her

injuries by two different chiropractic offices, pain management, and a spine surgeon and participated in physical therapy. Ms. Kimbrough underwent MRI studies and injection therapy.

Overall, I question the extent of injuries Ms. Kimbrough could have sustained as a result of this trauma and what treatment would have medically indicated and what treatment was excessive. I question MRI findings of the cervical spine and lumbar spine were a direct result of the MVA. It appears the MRI studies were "overread" or were not caused from this alleged trauma. The physicians felt Ms. Kimbrough's MRI of the lumbar spine demonstrated a disc herniation at L4-5, yet EMG/NCV studies were negative. In other words, if there was a disc herniation the disc was not impinging on a nerve root causing pain down the leg. Furthermore, I highly question the medical appropriateness of cervical and lumbar facet injections and radiofrequency ablations as medically necessary for Ms. Kimbrough. In other words, the treatment appears excessive. It appears Ms. Kimbrough was originally treating at AICA Ortho Spine and may have been redirected to another chiropractic clinic and Dr. Kabakibou and Dr. Chappius.

It appears Ms. Kimbrough was also involved in several previous MVAs, with three MVAs in 2016 alone. In reviewing Well Star Cobb Hospital's records, it appears she was in a MVA in May of 2016, was treated and released in "good condition." Moreover, I have been informed that Ms. Kimbrough sustained an injury in her teenage years, which resulted in chiropractic care, and also had at least three MVAs prior to the subject MVA. This, in addition to the underlying MRI films noting a degenerative disc and Ms. Kimbrough having a BMI of over 40, making her morbidly obese, is likely the cause of any issues Ms. Kimbrough has with her back. Although Ms. Kimbrough was young, this could contribute to significant development of degenerative disc disease. I believe her MRI findings were more related to obesity and degenerative disc disease than a result of this trauma.

8/8/17
Hal Silcox, III, M.D.

APPENDIX A

CURRICULUM VITAE

Revised: January 01, 2017

Name: Daniel Hal Silcox III, M.D.

Office Address:

Peachtree Orthopaedic Clinic
5505 Peachtree Dunwoody Road, Suite 600
Atlanta, Georgia 30342
Tel: (404) 404-1015

E-mail Address:

sperry@pocatlanta.com

Birth date and Place:

January 12, 1961
Atlanta, Georgia

Citizenship:

U.S.A.

Current Titles and Affiliations:

President and Orthopaedic Spine Surgeon
Peachtree Orthopaedic Clinic
Atlanta, Georgia

Executive Committee 2006-Present
Planning and Development Chair 2008-2013
President 2013- Present

Previous Academic and Professional Appointments:

Partner, Executive Shareholder, The Emory Clinic and The Emory Spine Center
1995-2001

Assistant Professor 1994-2001
Instructor 1992-1994
Department of Orthopaedic Surgery,
Emory University School of Medicine

Previous Administrative Appointments

Administrative Chief Resident, Orthopaedic Surgery
1991-1992

Chief of Spinal Surgery, VA Medical Center,
Atlanta, GA 1995 – 1998

Athlete's Medical Venue Coordinator, Beach Volleyball
Centennial Olympic Games, Atlanta, Georgia 1995-1996

Educational Director, The Emory Spine Center, 2000, 2001

Secretary-Treasurer Elect, Georgia Orthopaedic Society 2008-2009

Secretary Treasurer, Georgia Orthopaedic Society 2009-2012

President Elect, Georgia Orthopaedic Society 2012-2013

President, Georgia Orthopaedic Society 2013-Present

Doctor of the Day, Georgia State Capital, 2011, 2012, 2013

Licensures/Boards

4/6/89 #031834 Georgia

Specialty Boards:

1988 National Board of Medical Examiners

1995 American Board of Orthopaedic Surgery

2004 Re-certified, American Board of Orthopaedic Surgery

2014 Re-certified, American Board of Orthopaedic Surgery

Education:

1979-83 Emory University
Bachelor of Arts, Mathematics and Chemistry
Atlanta, Georgia

1983-87 Emory University School of Medicine
Doctor of Medicine
Atlanta, Georgia

Postgraduate Education:

1987-88 General Surgery Internship
Emory University Affiliated Hospitals
Atlanta, Georgia

1988-92 Orthopaedic Surgery Residency
Emory University Affiliated Hospitals

Silcox, Daniel Hal III

Atlanta, Georgia

1993-94 Orthopaedic Spine Fellow
The Emory Clinic Spine Center
Atlanta, Georgia

Committee Memberships:

Board Georgia Orthopaedic Society 2008-present
President
Nominating Committee, Chair
Georgia Orthopaedic Society, 2005
Operating Room Efficiency Committee
Northside Hospital 2005-2007
Surgical Services Committee
Northside Hospital, January 2002-2005
Surgical Case Review Committee
Emory University Hospital 1992-1995
Nominating Committee, Georgia Orthopaedic Society Meeting, 1999

Honors and Awards:

Eagle Scout Award
Sports Medicine Resident of the Year 1991-1992
Third Prize, Robert P. Kelly Orthopaedic Society. "Myoelectric Prosthesis: A Long-Term Follow Up and Comparison of Alternate Prosthetic Use." March 1990
Principle Investigator, Stryker Stand-Alone Cage Study, 1998-2004
Clinical Investigator, Medtronic rhBMP-2 Interbody Study
Medtronic LT Cage Study
Medtronic Posterolateral rhBMP-2 Study
Zimmer, Dynesys Study 2005-2012
Georgia Tobacco Use Prevention Advisory Board, March 2003- March 2004

Society Memberships:

Medical Association of Georgia
Southern Orthopaedic Association
Fellow American Academy of Orthopaedic Surgeons
North American Spine Society
Georgia Orthopaedic Society
